Individual Topic Results

Artificial Intelligence (Broad/Popular) — 8.9/10

Stories: 5 | Articles: 5

Summary: Recent developments in artificial intelligence span productivity gains, educational initiatives, and expanding global competition. AI applications are becoming integral to national security and corporate strategy, while educational institutions respond with new programs aimed at responsible AI use and critical thinking.

Dimension	Score	Reason
Relevance	10	All stories address various aspects of artificial intelligence, aligning well with the topic.
Recency	9	The stories are from March 4-6, 2026, which is within the 1-3 day range.
Summary Quality	8	Summary is informative and generally well-written, but could be more concise.
Source Quality	9	Reputable sources include Los Angeles Times, South China Morning Post, Forbes, and Reuters.
Story Diversity	9	Stories cover diverse angles of AI, including productivity, politics, education, and law.
Headline Quality	8	Headlines are clear and relevant but could be more engaging.
Factual Consistency	10	Details in the bullets align well with the headlines and topic.
Coverage	8	Covers major aspects but might miss some new applications in consumer tech or healthcare.
Readability	9	The text is generally well-structured and easy to scan.
URL Quality	9	URLs appear to link directly to specific articles, not homepages.

This briefing offers a comprehensive and timely overview of recent developments in AI, supported by high-quality sources and diverse perspectives. The presentation is generally clear, though bullet summaries could be slightly more concise.

► Story headlines

US Politics (Broad/Popular) — 8.5/10

Stories: 5 | Articles: 5

Summary: Recent developments in U.S. politics show a mix of controversies surrounding foreign policy, media criticism, and public responses to the administration's actions. The White House faces backlash over propaganda efforts and criticism from both national and international fronts regarding military strategies and operations.

Dimension	Score	Reason
Relevance	10	All stories directly relate to US politics, covering domestic and international controversies involving the White House.
Recency	9	Most stories are from the past 3 days, with one story dating back three days, which is acceptable.
Summary Quality	8	Bullets are concise and informative, although some could be slightly more detailed.
Source Quality	9	Reputable sources like The Guardian, Newsweek, and Al Jazeera are used.
Story Diversity	8	The stories cover various aspects of politics, from international relations to sports.
Headline Quality	8	Headlines are clear and engaging, although some are a bit long.
Factual Consistency	9	Bullets accurately reflect the headlines and topic.
Coverage	7	While the briefing covers significant stories, it might miss some finer details of ongoing political issues.
Readability	8	The briefing is well-organized and easy to scan, appropriate for the topic.
URL Quality	9	URLs mostly lead to specific articles, ensuring authenticity and specificity.

The briefing is well-constructed with a good variety of sources and stories, maintaining relevance and recency. It effectively highlights notable political events and reactions, though slight improvements in summarization details and headline length could enhance it further.

► Story headlines

Stock Market (Broad/Popular) — 8.6/10

Stories: 5 | Articles: 5

Summary: The stock market is experiencing volatility due to mixed economic signals and geopolitical tensions. The unexpected drop in payrolls has increased concerns about inflation and interest rates, affecting investor sentiment. Meanwhile, key index rebalances may reshape market dynamics as certain stocks are added to the S&P 500.

Dimension	Score	Reason
-----------	-------	--------

Relevance	9	Stories are well-aligned with the stock market theme, focusing on indexes, geopolitics, and economic data.
Recency	9	Most articles are from March 4 to March 6, 2026, which is very recent as of the current date.
Summary Quality	8	Summary captures the theme effectively, though it could include more specifics from the stories.
Source Quality	9	Includes reputable sources like Bloomberg, CNBC, and Yahoo Finance.
Story Diversity	8	Stories cover various angles related to the stock market, though multiple stories from the same sources could limit diversity.
Headline Quality	8	Headlines are clear and directly related to the stock market, providing a snapshot of the stories.
Factual Consistency	9	Bullets align well with headlines and the overall topic, maintaining consistency in data and themes.
Coverage	8	Major themes and influences in the stock market are included, though deeper insights into specific company impacts could enrich coverage.
Readability	9	Text is concise and well-organized, making it easy for readers to grasp the key points quickly.
URL Quality	9	URLs point to specific articles, which appear to be accurate and relevant to the headlines.

This briefing provides a well-rounded and recent overview of the stock market with a variety of sources and angles, though it could expand its scope with additional diverse insights.

► Story headlines

NFL (Broad/Popular) — 8.3/10

Stories: 4 | **Articles:** 5

Summary: Recent NFL news includes relocating major events due to geopolitical tensions and player preparations for the NFL Draft. Notably, Tom Brady's engagement in a high-profile feud with Logan Paul has captured attention, alongside team performance evaluations reflecting on coaches and player experiences.

Dimension	Score	Reason
Relevance	9	The stories are largely pertinent to the NFL, including player activities, event relocations, and draft preparations.
Recency	9	Most stories are recent, falling within the last 1-3 days from today, March 7, 2026.
Summary Quality	8	Bullets are informative and to the point, though some could be more concise.
Source Quality	8	Most sources are reputable, with Fox News, Axios, and Newsweek, though not all sources align strictly with the NFL topic.
Story Diversity	8	Stories cover a range of topics from event relocations to player preparation, reflecting a broad scope of NFL news.
Headline Quality	8	Headlines are punchy and accurately reflect the content of the stories.
Factual Consistency	9	Bullets are consistent with the headlines and topic, providing reliable descriptions of each event.
Coverage	7	While the summary covers many angles, it may lack certain major stories or developments in the NFL over the last few days.
Readability	9	The text is clear and scannable, maintaining an appropriate tone for a news briefing.
URL Quality	8	Most URLs seem to be specific article links, except for some that appear to be more general homepage URLs.

The briefing provides a relevant and timely overview of current NFL news with varied topics. While the coverage is mostly comprehensive, inclusion of major breaking stories could bolster completeness. URLs generally fit expectations, with a few being overly general.

► Story headlines

World News (Broad/Popular) — 8.4/10

Stories: 4 | **Articles:** 5

Summary: Recent world news highlights include ongoing conflicts, political shifts, and cultural updates across various regions. Key stories focus on international diplomacy, developments in Iran, and influential global media perspectives. The landscape remains dynamic with increasing emphasis on accurate reporting.

Dimension	Score	Reason
Relevance	9	The stories cover international diplomacy, cultural updates, and political events, which are key elements of world news.

Recency	9	All stories are from the last four days, meeting the recency criteria quite well.
Summary Quality	8	Bullets are concise and informative, summarizing the main points effectively.
Source Quality	10	Sources are highly reputable, including The Guardian, AP News, and The New York Times.
Story Diversity	8	Stories cover a range of topics within world news, but there is some overlap in focus on diplomacy.
Headline Quality	8	Headlines are punchy and accurate, though slightly long in some cases.
Factual Consistency	9	Bullets align well with their respective headlines and the overall topic of world news.
Coverage	8	Most major elements of world news are covered, though there could be more diversity in regional focus.
Readability	9	Text is well-scannable with appropriate tone for a news briefing.
URL Quality	6	Some URLs point to general sections rather than to specific articles, which detracts from specificity.

The briefing provides a solid overview of recent world news with reputable sources and timely stories. While diverse, greater specificity in URLs and more regional story variation would enhance the briefing further.

► Story headlines

Semiconductors (Niche/Specific) — 8.8/10

Stories: 5 | Articles: 5

Summary: Recent developments in the semiconductor sector highlight both challenges and opportunities. Companies like TSMC are ramping up production to meet surging AI demand, while Chinese firms push for domestic manufacturing capabilities amid US restrictions. Meanwhile, innovative trends in SIP and potential shifts towards superconductors hint at future advancements in technology.

Dimension	Score	Reason
Relevance	9	The stories are highly relevant to the semiconductor topic, covering major industry players and current challenges.
Recency	10	All stories are from March 5, 2026, which is very recent given today's date is March 7, 2026.
Summary Quality	9	The bullets are clear, informative, and well-constructed, providing succinct information.
Source Quality	9	The sources include reputed outlets like Yahoo Finance, SCMP, and CNBC.
Story Diversity	8	The stories cover different aspects of the semiconductor industry, although there is a noticeable emphasis on the impact of international relations.
Headline Quality	8	Headlines are attention-grabbing and adequately summarize the story content.
Factual Consistency	9	Bullets align well with the headlines and topic, maintaining factual accuracy.
Coverage	8	While the briefing includes key stories, it slightly lacks coverage on smaller tech trends and broader geopolitical impacts.
Readability	9	The text is easy to read, concise, and maintains a professional tone appropriate for the topic.
URL Quality	9	URLs are specific to articles and seem correctly formed, pointing to the appropriate content.

The briefing is comprehensive, covering a range of essential developments in the semiconductor sector with recent and well-explained content. It draws from reputable sources and maintains a high standard of clarity and relevance.

► Story headlines

Mergers & Acquisitions (Niche/Specific) — 8.7/10

Stories: 5 | Articles: 5

Summary: Mergers and acquisitions remain vibrant, with tech deals leading the charge despite regional conflicts. Companies like EVI Industries and Zscaler are leveraging acquisitions to boost growth, while some market uncertainties remain due to geopolitical tensions.

Dimension	Score	Reason
Relevance	8	All stories are related to mergers and acquisitions, but one article snippet, regarding Morgan Stanley, is an outlier in the list potentially causing confusion.
Recency	10	All stories are from the last three days.
Summary Quality	9	Bullets are concise and effectively highlight key points.
Source		

Quality	9	Sources are well-known and reputable, such as Bloomberg and Yahoo Finance.
Story Diversity	8	Coverage includes various perspectives like geographical expansion, revenue boosts, and market challenges.
Headline Quality	8	Headlines are clear and generally descriptive, though slightly varied in style.
Factual Consistency	8	Bullets align with headlines, but the inclusion of an unrelated headline in the articles section affects consistency.
Coverage	9	Main aspects of M&A activity are covered, including regional dynamics and sector-specific impacts.
Readability	9	The tone is professional and the content is easily scannable.
URL Quality	9	URLs are specific article links, enhancing credibility.

This briefing effectively covers recent mergers and acquisitions with a good mix of sources and angles. Minor inconsistencies in article snippets and topic coverage impact the evaluation slightly.

► Story headlines

Formula 1 (Niche/Specific) — 8.8/10

Stories: 5 | Articles: 5

Summary: The 2026 Formula 1 season kicked off with the Australian Grand Prix, marking a milestone for the Melbourne race. Significant changes, including reduced pit lane speeds and new car regulations, aim to enhance competition, despite challenges faced by teams ahead of the opening race.

Dimension	Score	Reason
Relevance	10	All stories are focused on the Formula 1 Australian Grand Prix and related developments.
Recency	9	Most stories are very recent, within the last 3 days, except two from March 4.
Summary Quality	9	Bullets are concise and informative, providing a clear understanding of each story.
Source Quality	9	Sources like The New York Times, The Guardian, and BBC are reputable, with only Express being slightly less authoritative.
Story Diversity	8	Stories cover distinct aspects such as regulations, race results, and logistical challenges.
Headline Quality	8	Headlines are mostly descriptive and engaging, though could be more varied in tone.
Factual Consistency	9	Bullets are consistent with headlines and the overall topic of the Australian Grand Prix.
Coverage	8	Major stories are present, though deeper coverage on initial race outcomes could enhance it.
Readability	9	Text is well-structured and easy to skim, with an appropriate and engaging tone for sports.
URL Quality	9	URLs appear to be specific to the articles, except one instance of a generalized link 'athletic'.

This briefing is very well-rounded, effectively covering the beginning of the 2026 Formula 1 season with the Australian Grand Prix. It includes information on regulations, team dynamics, and race details. Minor improvements could be made in variety and depth, particularly in post-race analysis.

► Story headlines

Supreme Court (Niche/Specific) — 9.0/10

Stories: 5 | Articles: 5

Summary: The Supreme Court is currently navigating significant rulings affecting various sectors, including voting rights and AI copyright law. Recent decisions have prompted legal disputes over tariffs and sparked political responses regarding parental rights in education.

Dimension	Score	Reason
Relevance	10	All stories are related to the Supreme Court and its recent rulings.
Recency	10	All stories are from the last 1-3 days, ensuring timely coverage.
Summary Quality	8	The summaries are informative and succinct, but could be more detailed.
Source Quality	9	Sources are reputable, including The Hill, Newsweek, Reuters, and Washington Examiner.
Story Diversity	8	Stories cover a range of issues influenced by Supreme Court decisions, though some topics overlap.
Headline Quality	9	Headlines are clear and informative, clearly reflecting the story's content.
Factual Consistency	10	Bullets accurately reflect the headlines and are factually consistent with the topic.
Coverage	8	Major issues are covered, but there could be more on other current Supreme Court cases.

Readability	9	The tone is appropriate and the content is easily scannable.
URL Quality	9	URLs seem to point to specific articles, not homepages, and are likely credible.

This briefing effectively covers recent Supreme Court decisions and their impacts, with a good balance of source quality and story diversity. Coverage could be slightly expanded for completeness.

► Story headlines

quantum computing startups (Custom/Unusual) — 8.6/10

Stories: 5 Articles: 5		
Summary: The quantum computing startup landscape is experiencing significant movements, with multiple companies evolving through acquisitions, public offerings, and technological breakthroughs. Quantum Computing Inc. expands its offerings, while Rigetti faces financial challenges despite its growth potential. Meanwhile, Horizon Quantum is set to go public, enhancing investor opportunities in the sector.		
Dimension	Score	Reason
Relevance	9	All stories are centered around quantum computing startups, fitting well within the given topic.
Recency	9	All stories are from the last few days, between March 4 and March 7, 2026.
Summary Quality	8	Summaries are informative and concise, though could be slightly more detailed on implications.
Source Quality	9	The sources are reputable, predominantly from Yahoo Finance and AP News.
Story Diversity	9	The stories cover a wide range of angles within quantum startup developments, including acquisitions, financial news, and technological breakthroughs.
Headline Quality	8	Headlines are punchy and relevant to the story, though slightly longer than ideal.
Factual Consistency	8	The bullets generally align well with the headlines, but further detail would ensure complete alignment.
Coverage	8	Coverage includes major developments but may miss more niche or emerging startups in the field.
Readability	9	The text is well-structured, easily scannable, and uses an appropriate professional tone.
URL Quality	9	URLs seem specific to detailed articles, enhancing credibility and accessibility.

Overall, this briefing is strong, providing a thorough and current overview of quantum computing startups. Utilizing reputable sources and covering a diverse range of topics related to the sector, it serves as a useful summary for those interested in recent industry movements.

► Story headlines

NYC restaurant openings (Custom/Unusual) — 7.9/10

Stories: 4 Articles: 5		
Summary: New York City is buzzing with exciting restaurant openings as of March 2026. Key highlights include the debut of the first-ever dual Applebee's and IHOP, as well as other unique dining concepts in the area.		
Dimension	Score	Reason
Relevance	7	Most stories are relevant to restaurant openings, but the cannabis exchange story is not directly related to the restaurant topic.
Recency	9	All stories are dated March 2026 and recent within the last few days.
Summary Quality	8	Bullets are concise and informative, providing key details about the restaurant openings.
Source Quality	8	Sources are generally reputable, including New York Post, Eater NY, and Thrillist.
Story Diversity	7	Stories cover different aspects of new dining options, but one story unrelated to restaurants impacts diversity.
Headline Quality	8	Headlines are punchy and informative, though the cannabis exchange headline may be off-topic.
Factual Consistency	8	Bullets generally match the headlines, but the inclusion of a non-restaurant business dilutes consistency.
Coverage	7	Covers several openings, but missing any major unique concepts or renowned chef openings.
Readability	9	The text is well-spaced and the tone is suitable for the topic.
URL Quality	8	URLs appear real and specific to articles, except for repeated cannabis exchange URLs.

The briefing provides a good overview of recent NYC restaurant openings with informative content and credible sources. However, the inclusion of a cannabis story not directly related to the topic weakens the briefing's focus slightly.

► Story headlines

indie game development (Custom/Unusual) — 7.4/10

Stories: 2 | **Articles:** 5

Summary: The indie game development scene continues to thrive as innovative titles like 'Hidden Folks' inspire unique exploration gameplay, while new projects in the genre are emerging rapidly. Developers are revolutionizing how players engage with environments, showcasing creativity and independence in gaming.

Dimension	Score	Reason
Relevance	6	While most stories relate to indie game development, one story focuses on an indie film director and other articles relate to indie music.
Recency	9	Most stories are within the last few days, with only one article being slightly older.
Summary Quality	7	The summary is informative and concise but lacks specificity about which new projects are emerging.
Source Quality	9	Sources like The Verge, Variety, and BBC are reputable and reliable.
Story Diversity	5	There is a mix between game development, film, and music, but the coverage within indie games could be broader.
Headline Quality	8	Headlines are punchy and relevant to their respective stories; however, some cover less relevant topics.
Factual Consistency	7	There is a slight mismatch with the topic as some stories focus on indie music and film rather than game development.
Coverage	6	The briefing misses some major developments in indie game trends by including less relevant music and film pieces.
Readability	8	The tone is appropriate for a news briefing, and the text is scannable, though a shift in emphasis within the topic occurs.
URL Quality	9	URLs appear to lead directly to specific articles on reputable sites, suggesting high validity.

The briefing has a strong start on indie game development but diverges with topics that are unrelated or only tangentially related to the main theme, leading to some dilution of focus.

► Story headlines

space tourism (Custom/Unusual) — 8.0/10

Stories: 3 | **Articles:** 5

Summary: Space tourism is undergoing notable shifts as Virgin Galactic prepares to revive its offerings following Blue Origin's exit from the scene. With this changing landscape, astronaut training and flight safety measures are becoming increasingly pertinent as the industry evolves.

Dimension	Score	Reason
Relevance	8	The majority of the stories are centered on space tourism though China's tourism news is less directly relevant.
Recency	9	Most stories are from March 2026, making them recent and relevant.
Summary Quality	8	The summary concisely covers the main points about the shifts in space tourism.
Source Quality	9	Sources like Bloomberg and BBC are reputable, though the express.co.uk article on general tourism lacked direct relevance.
Story Diversity	7	Stories are somewhat diverse, with different aspects of space tourism explored, but the China tourism angle is less relevant.
Headline Quality	8	Headlines are clear and concise, accurately reflecting the story summaries.
Factual Consistency	8	The bullets generally match their corresponding headlines and are aligned with the topic of space tourism.
Coverage	7	Some major stories are missing, such as current updates on other players in the space tourism industry.
Readability	8	The text is generally scannable and maintains an informative and appropriate tone.
URL Quality	8	URLs generally seem legitimate, particularly for the main stories; one unrelated article is noted.

Overall, the briefing provides a well-rounded view of the current space tourism landscape, though slight relevance and coverage issues exist in some aspects.

► Story headlines

labor unions (Custom/Unusual) — 8.2/10

Stories: 5 | Articles: 5

Summary: Recent developments around labor unions include significant legal battles and legislative actions that could reshape workers' rights across the US. Unions are actively pushing back against restrictions at both federal and state levels, while the labor market shows signs of stabilization.

Dimension	Score	Reason
Relevance	9	Most stories are highly relevant to the topic of labor unions, focusing on recent legislation and union activities.
Recency	9	All stories are within the 1-3 day range, ensuring the information is current.
Summary Quality	8	Bullets are generally informative and concise, though some lack context.
Source Quality	8	Most sources like Reuters and Axios are reputable, though Patch isn't typically a leading news outlet.
Story Diversity	7	There is some repetition, particularly with articles on media workers and digital unions.
Headline Quality	8	Headlines are engaging and clear, though a bit more specificity in some would be beneficial.
Factual Consistency	9	Bullets logically match their headlines and relate well to the overall topic.
Coverage	7	Major stories are covered, but the briefing could include more topics, such as strikes or other union actions.
Readability	8	The tone is appropriate with good readability, making it easy to scan through the information.
URL Quality	9	URLs appear to be valid and lead to specific articles rather than homepage links.

The briefing is generally well-constructed with relevant, recent stories and reputable sources, although the diversity of stories and completeness of coverage could be slightly improved.

► Story headlines

Morgan Stanley wealth management (Edge Cases) — 8.0/10

Stories: 5 | Articles: 5

Summary: Morgan Stanley is undergoing significant workforce reductions, laying off about 2,500 employees, which constitutes 3% of its global workforce. Despite a record revenue year in 2025, the cuts affect key divisions, including wealth management, as the bank adjusts its business strategy. Additionally, Morgan Stanley has made cautious moves regarding its investment strategies in Asia, particularly downgrading Indian stocks due to geopolitical concerns.

Dimension	Score	Reason
Relevance	8	Most stories focus on Morgan Stanley's workforce and strategic shifts, however, not all stories focus specifically on wealth management.
Recency	9	Stories are mostly recent, with one article from March 4, which is just slightly older than the 3-day window.
Summary Quality	8	Bullets are informative and concise, clearly summarizing key points of the individual stories.
Source Quality	9	Sources include reputable outlets like Wall Street Journal, Bloomberg, and Newsweek, ensuring credibility.
Story Diversity	7	While there is some variation in focus (job cuts, stock implications, investment strategy), stories are generally centered around layoffs.
Headline Quality	8	Headlines are clear and focus on the main events; they are appropriately brief and descriptive.
Factual Consistency	8	Bullets align well with the headlines and the overarching summary, effectively detailing the key facts.
Coverage	7	Major stories about layoffs and investment strategy shifts are covered, but less focus on wealth management specifics.
Readability	8	The text is well-structured, easy to scan, and uses an appropriate tone for a professional news summary.
URL Quality	8	URLs appear to be specific to articles rather than generic homepages, supporting detailed references.

The briefing provides a well-rounded summary focusing on Morgan Stanley's strategic layoffs and investment decisions, with reputable sources and strong recency. However, coverage could more deeply explore wealth management specifics to align fully with the topic.

► Story headlines

news (Edge Cases) — 7.5/10

Stories: 5 | **Articles:** 5

Summary: Recent news highlights include an investigation into global events by major outlets like The New York Times and The Guardian, focusing on their commitment to accurate reporting. In addition, the AP maintains its presence with international news coverage, amidst critiques regarding transparency and portrayal.

Dimension	Score	Reason
Relevance	7	The stories are broadly relevant to 'news', but they lack a specific, cohesive topic focus that ties them together beyond major news outlets.
Recency	9	Most stories are dated between March 4 and March 6, 2026, which is within a 3-day window.
Summary Quality	7	The summary provides a broad overview but lacks specific details about the news events covered.
Source Quality	9	The sources are highly reputable and well-known news organizations like The New York Times, The Guardian, and AP.
Story Diversity	6	There is a bit of repetition with similar themes and focus on the reputation and operations of the news outlets rather than specific news events.
Headline Quality	8	Headlines are clear and informative, reflecting the content of the stories though somewhat generic.
Factual Consistency	8	The bullets generally align with headlines and anticipated content topics, though some discrepancies, like the mention of 'divorce legalization', could confuse readers.
Coverage	6	The briefing lacks specific mention of any major or breaking news events, focusing instead on the role of the news outlets.
Readability	8	The tone is appropriate and text is easy to scan, though it could benefit from more detail on specific news topics.
URL Quality	7	URLs mostly lead to general sections of websites rather than specific articles, which impacts usability.

This briefing provides a solid overview of major news outlets' engagement with global news. However, it lacks depth in covering specific current events, which impacts its usefulness for users looking for detailed news updates. The sources are credible, but the focus on journalistic practices rather than distinct news stories limits its relevance and coverage completeness.

► Story headlines

memes (Edge Cases) — 8.6/10

Stories: 5 | **Articles:** 5

Summary: Recent discussions around memes highlight their role in political commentary and social satire. Various figures, including Kristi Noem and RFK Jr., have ignited a wave of online commentary, with social media users leveraging humor to respond to political events. Additionally, brands like Pokémon are taking a stand against unauthorized use of their intellectual property in meme culture.

Dimension	Score	Reason
Relevance	9	Most stories directly relate to the topic of memes as they discuss their role in social commentary and intellectual property issues.
Recency	10	All stories are dated within the last two days, ensuring up-to-date content.
Summary Quality	8	The bullets concisely convey key points, though additional context could enhance understanding.
Source Quality	9	The sources are reputable outlets such as Newsweek, The New York Times, and The Wall Street Journal.
Story Diversity	8	The stories cover varied aspects of meme culture, from political commentary to intellectual property rights.
Headline Quality	8	Headlines are generally punchy and convey the story's focus accurately.
Factual Consistency	9	Bullets match well with headlines and maintain relevance to the overall topic.
Coverage	7	Major stories are covered, though additional stories on different perspectives of meme impact could enhance completeness.
Readability	8	The text is clear and engaging, making it easy to scan and understand.
URL Quality	10	URLs appear specific to articles rather than generic site homepages, adding credibility.

This briefing provides a comprehensive and current look at memes' impact on political and social discussions, with a strong selection of reputable sources.

► Story headlines

Pipeline Analysis

Query Planner

- **Architecture:** Curated topics (4 categories, 40+ configs) skip LLM planning entirely — efficient and consistent.
- **Custom topics:** LLM planner generates search queries with type selection (articles/vector/both). Plans cached 24h in Redis.
- **Splitting logic:** Compound topics like "AI and Tech" are split into separate queries — good for coverage breadth.
- **Strength:** Three-tier search type system (articles → vector → both) is well-designed for varying topic specificity.

Perigon Search Quality

- **Cascade fallback:** top100 sources (3d) → any source (7d) → vector search. This is excellent for balancing quality vs coverage.
- **Source filtering:** Excludes Non-news, Opinion, Paid News labels. Reprints filtered. English-only, Article medium.
- **Interleaving:** Multi-query results are round-robin interleaved then deduped — ensures balanced coverage.

Caching

- **TTL:** 6 hours for article results, 24 hours for query plans. Section-level caching available.
- **Recommendation:** 6h TTL is reasonable for news. Consider 3-4h for breaking-news-heavy topics (politics, markets).

Error Handling

- **LLM retry:** Single retry on parse failure — good basic resilience.
- **Cascade fallback:** 3-step article search degradation prevents empty results.
- **Graceful degradation:** Failed topics return stub briefing rather than crashing entire request.

Cost Efficiency

- **Model:** GPT-5-nano at \$0.15/\$0.60 per 1M tokens — very cost-effective.
- **Per briefing:** ~1 query planner call + 1 assembly call per topic. Cached queries avoid redundant Perigon API hits.
- **Estimated cost:** ~\$0.001-0.003 per topic section (nano pricing). Full 5-topic briefing ≈ \$0.01-0.02.

Key Findings

What Works Well

- **Source quality filtering** — top100 sourceGroup + label exclusion produces reliable, reputable sources
- **Curated topic configs** — pre-optimized queries for 40+ topics bypass LLM planning, improving speed and consistency
- **Cascade fallback** — 3-step degradation ensures coverage even for niche topics
- **Cost efficiency** — GPT-5-nano keeps per-briefing costs under \$0.02
- **Deduplication** — URL-based dedup + reprint filtering prevents repetitive content
- **Parallel execution** — all topics fetched and assembled concurrently

What Needs Improvement

- **Date filtering too permissive:** 2-month window allows stale content. Consider 7-14 day max for mainstream topics.
- **No URL validation:** LLM could hallucinate or mangle URLs. Add runtime URL validation (check HTTP status).
- **Vector search quality:** No source quality filtering on vector endpoint — can return low-quality content. Post-filter vector results by known source lists.
- **Missing topic coverage detection:** No mechanism to detect if major breaking stories are missing. Consider a "coverage check" step.
- **Section caching unused in main flow:** getCachedSection is checked but setCachedSection is never called in briefing-generator.ts. Wire it up to cache assembled sections.
- **No token usage tracking:** Usage is logged but not stored. Track in Redis for cost monitoring dashboards.
- **Edge case topics:** Very broad ("news") or very niche ("Morgan Stanley wealth management") may produce poor results. Consider pre-validation or user guidance.

Actionable Recommendations

1. **Tighten date filter:** Reduce max age to 14 days for broad topics, 30 days for niche. Add per-category TTL config.
2. **Cache assembled sections:** Call setCachedSection after successful assembly to avoid redundant LLM calls for the same topic within 6h.
3. **URL health check:** Spot-check 1-2 URLs per briefing with HEAD requests. Flag or replace dead links.
4. **Vector post-filtering:** Apply source reputation scoring to vector search results before feeding to LLM.
5. **Usage dashboard:** Store token counts + Perigon API call counts in Redis. Build a /admin/usage page.
6. **Adaptive cache TTL:** 3h for politics/markets, 6h for tech/sports, 12h for niche/lifestyle.
